

Global Medical Foundation has established a respected and eminent reputation for providing high quality medical care throughout the world. Many of the surgical procedures performed are not available in many of the countries we visit.

Arranging medical missions involves coordination with national and local governments as well as local health professionals. Mission site visits must be conducted in advance to assess what is needed.

Once a mission site has been established we ask for support from pharmaceutical and medical equipment companies. We invite talented and experienced doctors, nurses, allied health professionals and humanitarians to join us to provide ongoing successful missions around the year.

## Serving the **underprivileged** and **underserved** people of the world

Global Medical Foundation (GMF) was established in 1996 by eight medical professionals, who shared a common goal of providing much needed medical care for less privileged individuals.

Their multi-ethnic diverse backgrounds allowed them to develop cultural sensitivities to create a unique, charitable medical organisation.

Since its inception GMF has taken part in medical and surgical missions in Africa, Asia, Latin America and Eastern Europe.

GMF Australia is registered as a charity and governed by an Australian Board.

It operates in collaboration with their US counterparts providing high quality, free medical and surgical care to indigenous communities where it is needed the most.

One hundred percent of donations solicited are used for medicines and supplies to support our missions. Our doctors, nurses, and volunteers provide a free service and pay for their own expenses.

## Join our team

We are always looking for medical professionals who are willing to share their skills and dedicate their time to support our medical missions.

If you would like more information about volunteering with GMF Australia contact us via our website [www.gmfaustralia.org.au](http://www.gmfaustralia.org.au)

## Support our team

Support Global Medical Foundation Australia and make a difference.
